Forward Facing (age 2 - age 7)

- Always in the back seat (if possible)
- Should be used with tether to prevent additional forward movement
- Harness straps should come from at or above the shoulder and be snug enough that excess material cannot be pinched
- Recommended until child has outgrown height or weight limit on seat
- Seats that forward face: Convertible (rear facing to forward facing, 3-in-1 (rear facing to forward facing to booster)
