Don’t Leap Out Of A Booster Too Soon. Take the 5-Step Test.

1. Does the child sit all the way back against the vehicle seat?
2. Do the child’s knees completely bend over the edge of the vehicle seat with the feet touching the floor?
3. Does the shoulder belt cross the child’s shoulder between the neck and arm and the lap belt fit low and snug across the hips?
4. Does the vehicle seat provide the child with adequate head protection?
5. Can the child stay seated in this position for the entire trip?

If the answer to any of these questions is **NO**, then the child is not ready to use an adult seat belt. Continue to use the booster seat until the adult seat belt fits appropriately.
