

Booster Seats (age 4 - age 12)

- Always in the back seat (if possible)
- Should only be used with a lap and shoulder belt
- Shoulder portion should cross chest, not behind the back or under the arm
- Lap portion should sit low on hips, not the stomach
- Recommended until child has outgrown height or weight limit AND can pass the 5-step test.
- Types of booster seats: 3-in-1 (rear facing to forward facing to booster), backless booster, high back booster
