

Forward-facing Car Seats (2 - 7 years)

- Always in the back seat (if possible)
- Should be used with tether (or top strap) to prevent additional forward movement
- Harness straps should be positioned at or above the shoulder and be snug enough that excess material cannot be pinched
- Recommended until child has outgrown height or weight limit on seat
- Seats that forward face:
 - Convertible (rear-facing to forward-facing);
 - 3-in-1 (rear facing to forward facing to booster);
 - and Combination (forward-facing with harness to booster)
