

**Not wearing your safety belt could cost you money, or worse-
YOUR LIFE!**

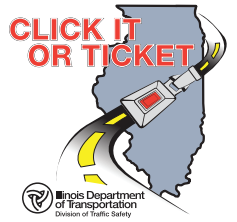

EXCUSES FOR NOT BUCKLING UP REASONS YOU SHOULD BUCKLE UP, EVERY TRIP, EVERY TIME

- “I’m just driving down the street.”** *This is the best time to wear your safety belt, since 80% of traffic-related deaths happen within 25 miles of the home and under 40 miles per hour.*
- “I won’t be in a crash, I’m a good driver.”** *You may be a good driver, but what about the millions of other drivers on the road?*
- “There aren’t as many drivers out at night.”** *Late night hours are the most dangerous driving hours, when the highest percentage of motorists die in alcohol-involved crashes and safety belt usage is the lowest.*
- “I don’t want to be trapped in the car.”** *The best place to be in a crash is in your car. You risk the car rolling over on top of you if you are thrown out.*
