## CHAD: Children Have An iDentity

The original CHAD sticker was developed to identify children in child safety seats who might be involved in a vehicle crash. This CHAD bicycle sticker has been created for a similar reason. When children are riding their bicycles, they usually do not carry identification. By placing this sticker under the bicycle seat or inside a helmet, your child can be quickly identified in an emergency.

**Remember, bicyclists should always ride with the traffic and wear a helmet!**
